COURSE CODE: CSA1418 **COURSE NAME: Compiler Design**

Experiment 8: C Program to Find FOLLOW() for a Given Grammar

Aim:

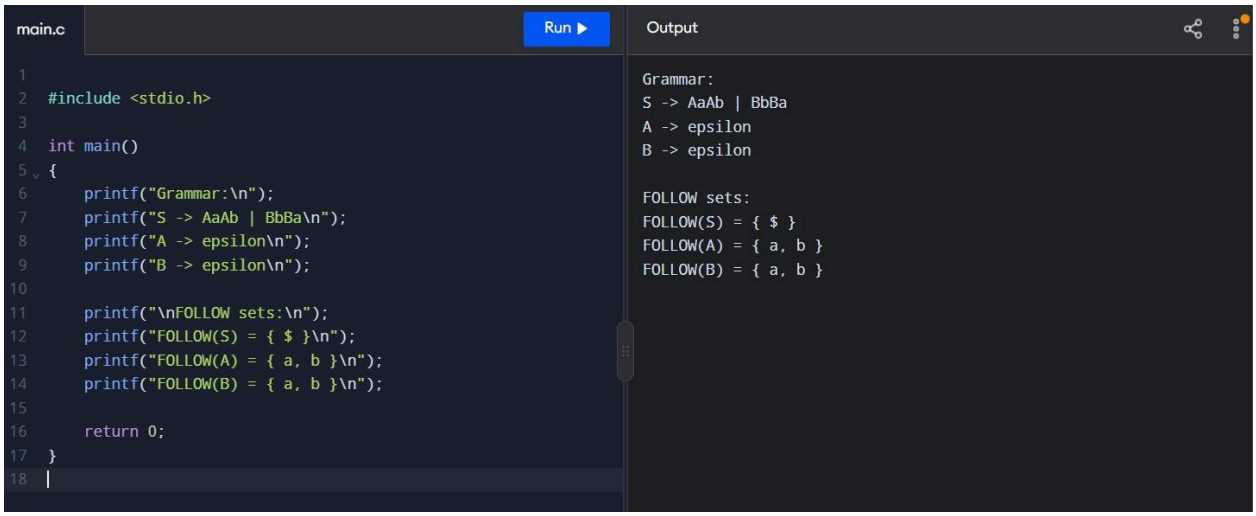

To write a C program to find the FOLLOW sets for the given grammar.

Software Used: Programiz Online C Compiler.

Algorithm / Procedure:

- Open the Programiz Online C Compiler.
- Write the C program to display the FOLLOW sets for the given grammar.
- Consider the grammar:
  - S → AaAb | BbBa
  - A → ε
  - B → ε
- Determine the FOLLOW sets of non-terminals A and B.
- Include the end marker $ in FOLLOW(S), since S is the start symbol.
- Display the calculated FOLLOW sets.
- Compile and execute the program.
- Verify the output.

Execution Screenshot:

Result:

Thus, the C program was implemented and executed successfully to display the FOLLOW sets for the given grammar.
